

# DOWN ON THE FARM

## Building a Fence Counting Activity

An early learning activity to build counting skills.

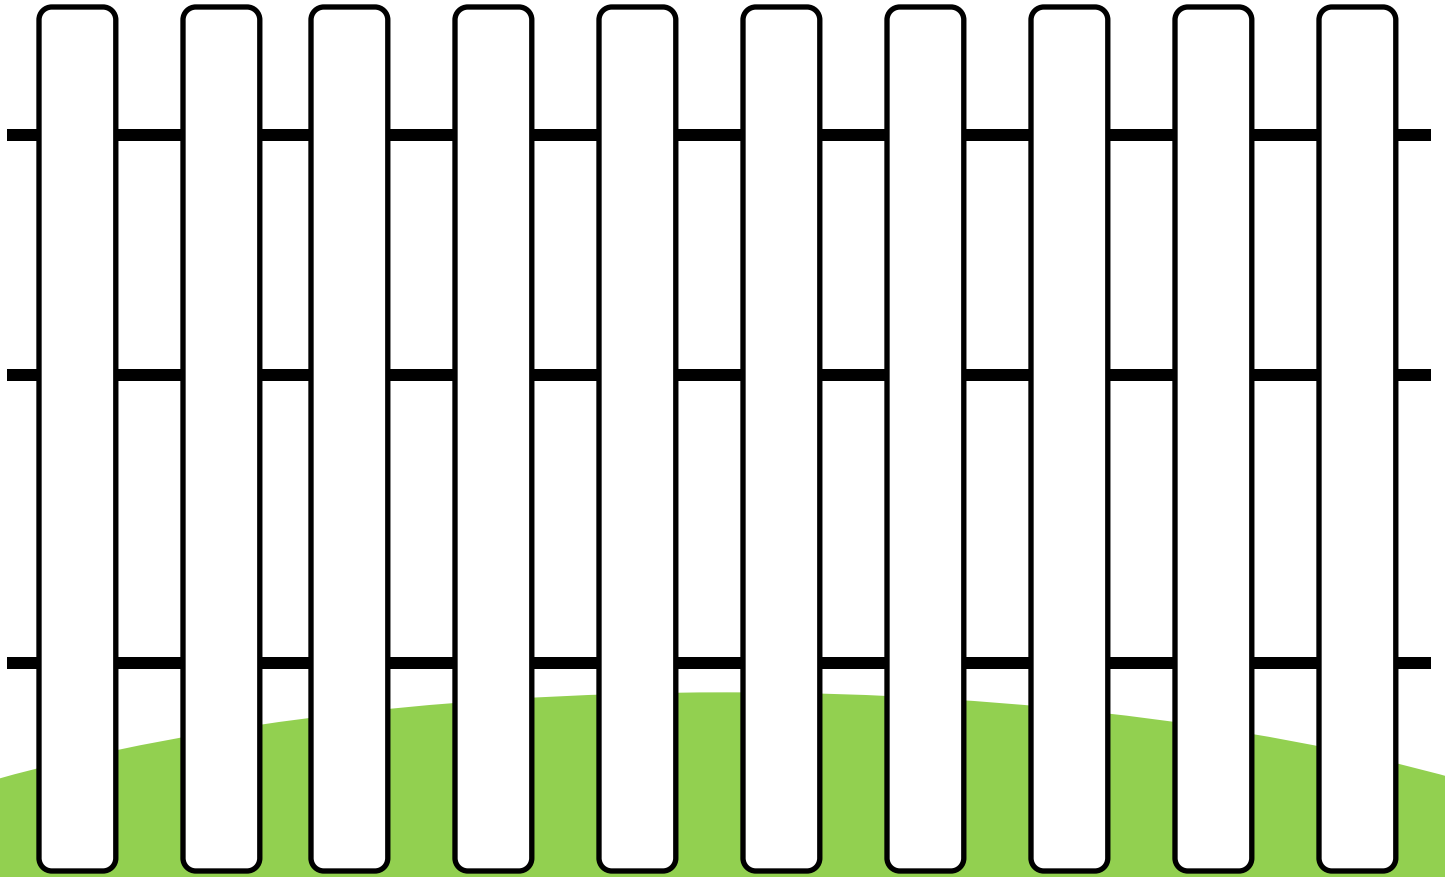

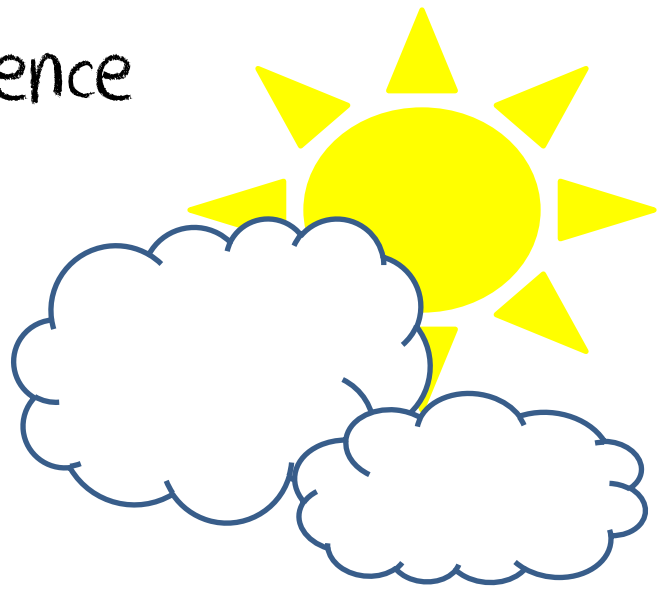

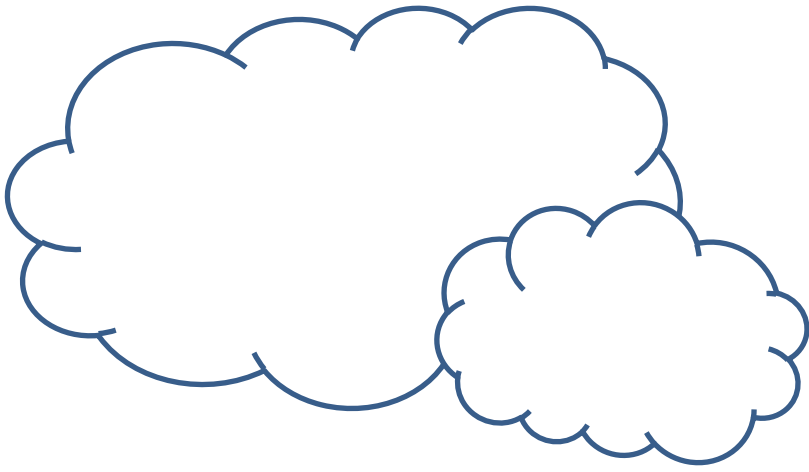

To set up this activity, you will need to make a set of popsicle sticks numbered 1-10. Depending on your child's skill level, this activity can be used two ways:

First, you can use the numbered fence template and have your child match the numbers on the popsicle sticks with the numbers on the fence.

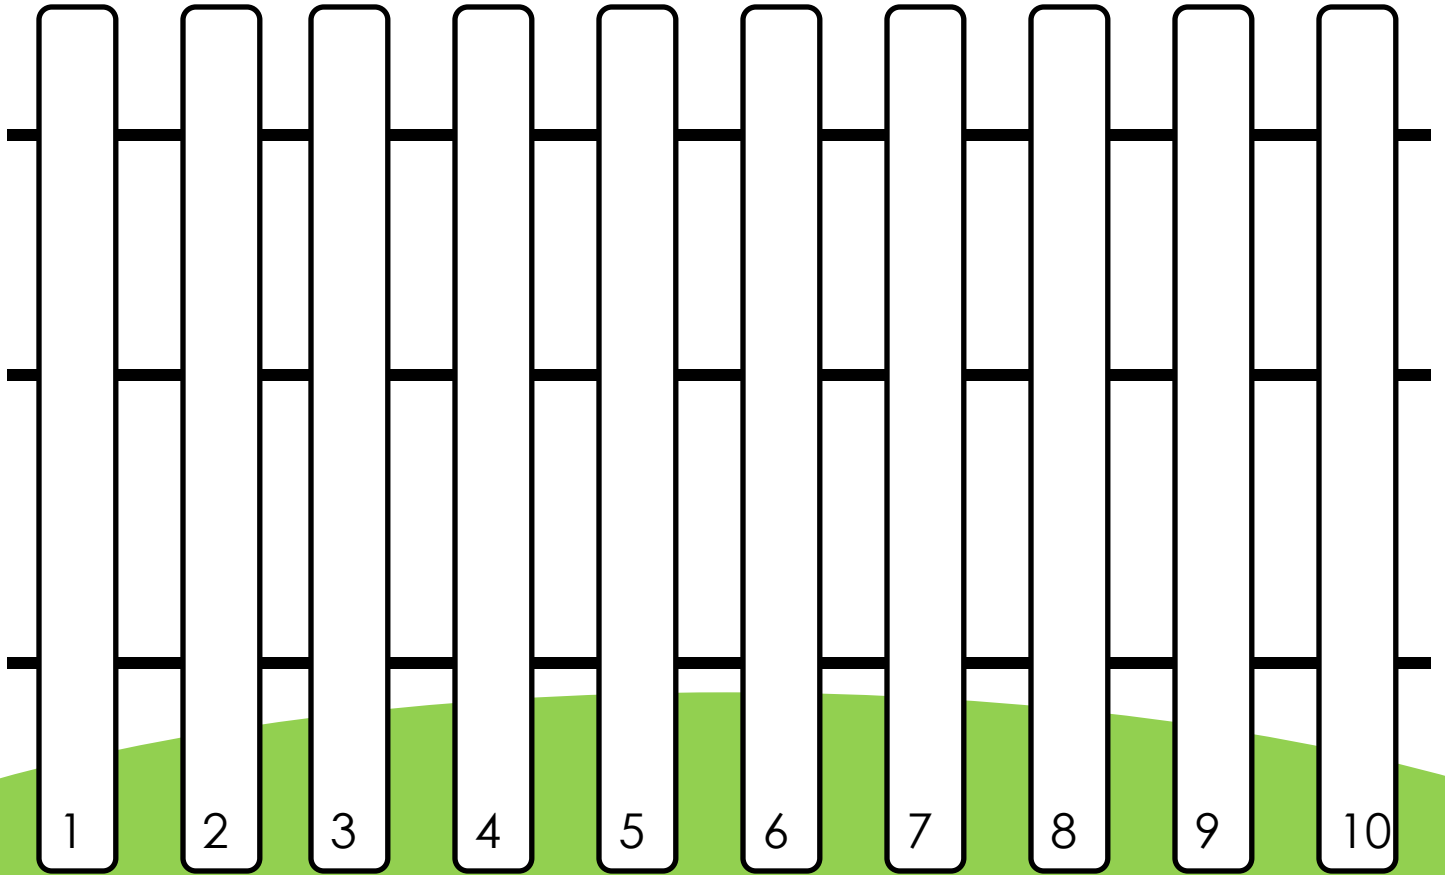

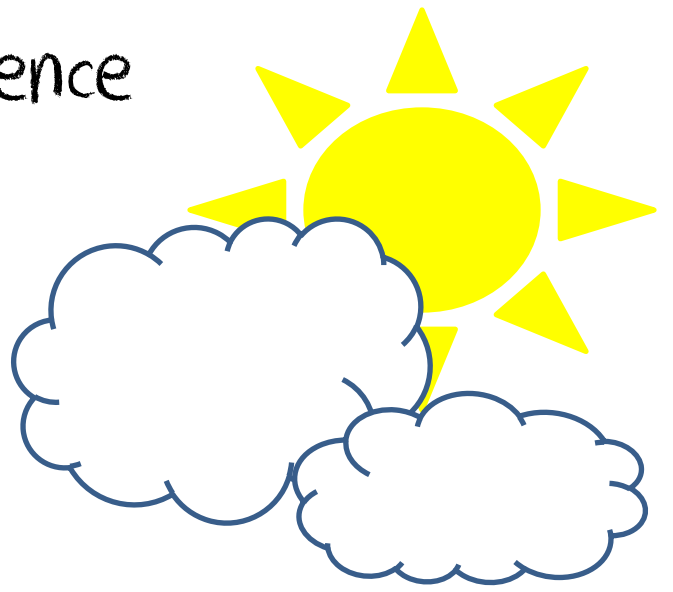

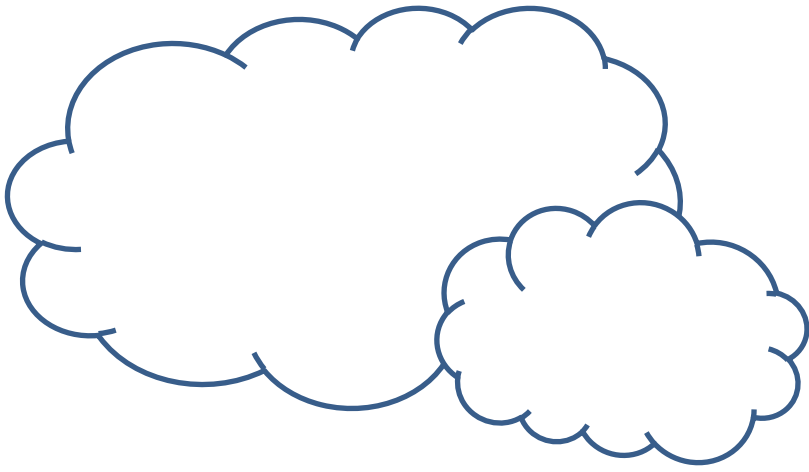

Second, if your child is ready, they can use the blank fence template and put the popsicle sticks in the correct order.

A variation of this would be using numbers higher than 10, for example – 11-20, and have them put those numbers in order using the blank fence template.
